

Barton Grange

Garden and Leisure Centre

**Imoon Lighting
(UK) Ltd**
Barton Grange
Garden and
Leisure Centre
Lancashire, UK

Imoon Lighting (UK) Ltd create an energy efficient and harmonious lighting scheme for Barton Grange Garden and Leisure Centre in Lancashire.

International commercial lighting company, Imoon, were tasked with providing a sustainable, unparalleled shopping experience for the Barton Grange Garden and Leisure Centre in Brock, Nr Preston, Lancashire.

Officially opened in 2018 by HRH Princess Anne, the centre comprises of the main Garden Centre, the Farm Shop, a Cook Shop area, the Willows Restaurant and the recently opened Flower Bowl Entertainment Centre.

The company is characterised by its commitment to protecting the environment, so Imoon has therefore developed its lighting as a meeting point between the company's eco-friendly values and a study of space through light, creating a harmony of extraordinary elegance.

In the Garden Centre, Imoon has provided lighting designed to enhance the colours of the seasons. Warm lights evoke a welcoming atmosphere and invite visitors to take a walk in the greenery. LED solutions that guarantee maximum visual comfort and high energy efficiency have therefore been installed. In addition, the Venere Pro I, equipped with the Casambi system, proved to be a valid alternative to the existing double and triple units. The light management tool combined with the lighting fixture allows advanced control via Bluetooth Low Energy technology.

In the Farm Shop area, the fixtures have been equipped with special LEDs capable of emphasising the variety of the products on display. In the Cook Shop area, the halogen pendant lamps have been converted into recessed Venere Pro models, obtaining maximum results in terms of light quality and a saving both

in the number of lighting fixtures used and in the amount of energy consumption.

Imoon also designed the lighting for the large curling hall in the Flower Bowl Entertainment Centre, where in perfect synthesis with the curves of the ceiling the Venere Pro High Outputs feature at the highest points, with the High Efficiency variants of the same collection seen at the sides ensuring uniform light.

Russell Winteridge, General Manager of Barton Grange, commented, "We have been working with Imoon for years due to the quality of its solutions and its reliability. We greatly appreciated the availability and experience of Ron Coleman and the support offered by the company in every phase of the project. By replacing existing light sources with sustainable solutions, Imoon was able to perfectly interpret the essence of our company. We were particularly enthusiastic about the Venere range - it can combine functionality and aesthetics together with the Casambi system allowing us to shape evocative atmospheres."

Ron Coleman, Managing Director of Imoon Lighting (UK) Ltd, concluded, "Working with Barton Grange Garden and Leisure Centre has been an ambitious and highly prestigious project for us. We paid constant attention to the quality of the light to highlight the peculiarities of each individual area and ensure maximum efficiency. This project as a whole allows energy savings of approximately 61 percent, with a payback period of 21 months, fitting in perfectly with the initial brief."
